

Need to train and certify your HIAB crane operators?

Atlas Polar has a course for you!

Under Ontario's labour legislation, owners of articulated cranes under 16,000 lbs. capacity must accredit their operators.

Atlas Polar, the Canadian distributor for HIAB cranes, now offers two comprehensive operator training courses, designed to help owners and managers accredit their operators.

These courses:

- apply to operator accreditation
- improve operator safety
- increase operator productivity
- extend the life of your crane
- reduce crane down-time.

Accreditation Course 1A HIAB Crane Operation

This one-day course combines practical and theoretical aspects of crane safety and operation. This course has been developed to meet the intent of regulations contained in the Occupational Health and Safety Act (Ontario).

This diploma course is designed for the experienced operator.

Course 1B HIAB Crane Introduction

This half-day course is designed to introduce new operators to articulated crane operation, and prepare them for course 1A.

The course includes written and hands-on training, with an emphasis on safety. A one-on-one practice session with your crane is included.

Following the course, the operator should arrange for a minimum of one month of hands-on work with an articulated crane, accompanied by another registered and accredited operator.
